

## OXCON

### Oxalic Acid

OXcon (oxalic acid concentrate) is a powerful blanding agent that removes rust stains from around nails, spikes, and screws.

OXcon should not be used for spot cleaning since it may cause blotching of the surface. **Apply from bottom up, rinse from top down.**

OXcon comes as a concentrate that is diluted with water prior to use. It is best applied using a garden type pump-up sprayer but a brush or broom will also work. Apply a liberal amount to the wood, let it work on the surface for 10 to 15 minutes and rinse it thoroughly with clean water.

### Features and Statistics

- **4 to 1 concentration for ease of use**
- **Restores weathered wood to natural color**
- **Brightens darkened or faded wood**
